THS Daniel Pienaar

2015 - 2019

Matric

Subjects:

Technical mathematics and science.

Engineering graphic and design.

Civil Engineering and Life orientation.

English and Afrikaans.

Experience

Frontend Development

April 2022 - Current

As a highly motivated frontend developer, I possess a year of experience in building projects for learning purposes. I have developed a deep understanding of the fundamentals of the web and have gained hands-on experience working with a wide range of technologies, including HTML, CSS, JavaScript, jQuery and React. Through my portfolio, I have demonstrated my ability to build responsive user-friendly websites that align with modern web development standards. Moreover, I have completed various tests and learning services to enhance my knowledge and stay up-to-date with the latest web development trends. I am a self starter who is capable of working independently and collaboratively as part of a team.

CVL Construction

January 2022 - April 2022

Site Foreman

I was responsible for scheduling, co-ordinating and supervising the work of all site operatives, ensuring that all work is delivered safely on time and within budget along with managing equipment and materials required.

Cohen Property Development

November 2020 - November 2021

Site Foreman

I had the opportunity to collaborate with various teams such as design, finance, material and machine personnel. I was responsible for overseeing the daily operations of multiple contractor teams, with an average headcount of 30 contractors per day, to ensure timely completion of projects. My role involved monitoring and ensuring the adherence of the construction team to the strict measures of safety and quality work. Through my guidance and direction, we were able to successfully complete 24 houses, averaging three houses a month I effectively managed the project budget, making sure that expenses were kept under control while still delivering high-quality work.
